<b>Incident Objectives</b>	1. Incident Name <b>Horse Prairie</b>	2. Date Prepared 9/4/2017	3. Time Prepared 2300
4. Operational Period (Date and Time) 9/5/2017      0600 - 1800 <b>Day Shift</b>			
5. General Control Objectives for the Incident (include Alternatives)			
<p>a. Fight fire aggressively and safely; maintain LCES at all times.</p> <p>b. Minimize fire size primarily through the use of direct tactics and a staffed night shift where possible.</p> <p>c. Keep fire South of Olalla Creek, West of Doe Creek, North of Middle Creek, East of Union Creek</p> <p>d. Maintain and build positive relationships with impacted landowners, public, and cooperating agencies.</p> <p>e. Maintain strict financial records and fiscal and equipment accountability.</p> <p>f. Act in a respectful and professional manner around the community.</p> <p>g. Protect tribal, cultural, archeological, and sensitive plant sites by coordinating with Resource Advisors.</p> <p>h. Provide for initial attack and assistance as requested on new and emerging incidents.</p>			
6. Weather Forecast for Period			
See attached weather forecast			
7. General Safety Message			
<p>*Anticipate and look for changes in weather and fire behavior</p> <p>*Initiate all actions based on current and expected fire behavior</p> <p>*Communicate hazards and mitigation measures to all personnel</p> <p>*Stay hydrated</p>

## Safety Analysis of Tactical Actions (215A)

Incident Name:				Date and Time Prepared:				Operational Period:					
Horse Prairie				9/4/2017				Day 9/5/2017					
TACTICAL HAZARDS													LCES MITIGATION
	A/M		P		Q	S	T		Y				
Indirect Fireline					X	X	X						Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Downhill Fireline					X	X	X						Follow downhill line standards. Bring fire with you. Insure lookout can see entire area. Identify safety zones and escape routes before starting work. Use page 9 of Incident Response Pocket Guide. Establish LCES.
Underslung Fireline					X	X	X						Cup trench. Post lookout that can see all areas of under slung line. Establish LCES.
Mid-Slope Fireline					X	X	X						Insure that lookouts can see ALL area of mid slope line as well as areas upslope of mid slope line. Establish Trigger Points and reassess as fire or weather conditions change. Establish LCES.
Frontal Assault					X	X	X						Identify thresholds for reassessment. Establish LCES.
No Anchor Points					X	X	X						Find/construct safe, effective anchor before engaging. Establish LCES.
Extreme Conditions (Spotting, Wind)	X		X		X	X	X		X				High potential given because of low live fuel moisture and high probability of ignition. Anticipate. Identify thresholds for reassessment, monitor weather. Establish LCES.
Heavy Equipment					X	X	X						Do not work down slope below heavy equipment. Establish communications with operator. Post lookout for rolling debris. Be aware of loose soil and rock. Establish LCES.
Air Ops: Multi Aircraft	X		X		X	X	X		X				Insure that all personnel are at least 500 feet from bucket or retardant drops. Utilize air attack. Establish LCES.
Hazard Trees/Snags	X		X		X	X	X		X				Assess, Identify, Communicate, Isolate, Mitigate. Establish LCES.
Hazardous Materials													Utilize the Incident Response Pocket Guide. Identify and isolate any suspected hazardous materials. Notify supervisor and warn others in area. Keep your distance. Establish LCES.
Unburned Area Unknown Fires	X		X		X	X	X		X				High potential for re-burn in brush and conifers preheated by earlier burn. Blowdown areas keep a close eye on. Post lookouts. Watch for increase in burn activity. Monitor weather for change in RH and or wind conditions. Establish LCES.
Transportation	X		X		X	X	X		X				Drive defensively with headlights on, seatbelts fastened. Stay to the right side of the road. Yield to uphill traffic and flaggers. Drive slowly and watch out for the other person. Establish LCES.
Communication	X		X		X	X	X		X				Establish LCES. Insure that communications between lookouts and line resources are maintained. Escape Routes are identified and reevaluated continuously.
Steep Terrain Gravity Hazards	X		X		X	X	X		X				Do not work crews above or below each other. Post lookouts for rolling material. Watch footing in loose or wet soil and rock. Do not work below heavy equipment. Establish LCES.
Environmental Hazards	X		X		X	X	X		X				Bees, Snakes, Bears and other animals are in the area. Carry medical kits for those with allergic reactions, do not harass or instigate any confrontations with animals, warn others of presence. Poison Oak - Preventative measures, locate, isolate, mitigate
Structures							X		X				Follow page(s) 12 - 16 of Incident Pocket Response Guide. Establish LCES.
Transfer of Command													Make sure you understand your assignment. Know who your supervisor is and who is working for you. Do not assume. Re-brief all resources.
Span of Control					X	X	X						Adhere to Span of Control Guidelines-5.1. Ensure Overhead is sufficient for operation and identify chain of command. Ensure everyone receives a briefing. Retain control at all times.
Falling Operations	X		X		X	X	X		X				Post road guards. Have a falling boss who can be in contact with crews working in the area. Use qualified Fallers.
Power Lines						X	X						Watch for down power lines and poles. Identify, isolate and report. Notify supervisor and warn others in area. Keep your distance.
I.A.	X		X		X	X	X		X				Follow the 10 and 18, LCES - before engaging, re-evaluate for each new start!

## HEALTH AND SAFETY MESSAGE

***SAFETY*** starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Horse Prairie

DATE: September 5, 2017    Operation Period: Day

### Major Hazards and Risks:

#### Hazard Trees

#### Driving

#### Hydration

#### Health

Continue to be diligent, “expect the unexpected”. There is the potential for an escape in every division, even the quiet ones. Review the **Common Denominators of Fire Behavior on Tragedy fires**. Ensure your lookouts are posted, you have communication, your escape routes and safety zones are known. One foot in the black is safest where ever possible.

Driving – **School starts!!!** Today on your drive to/from camp you may see children and school buses.

Camp Crud – Proper hygiene practices will go a long ways to alleviate the “camp crud”. Proper hand washing is critical for preventing all sorts of illnesses. ALWAYS wash your hands:

1. Before handling or eating food
2. After using a public restroom
3. After coughing or sneezing
4. After handling money
5. After petting a dog or cat

Drink plenty of fluids. Eat your fruit and vegetables!

*“What you do speaks so loudly that I cannot hear what you say” – Ralph Waldo Emerson*

### Watch Out Situation of the Day

15. WIND INCREASES AND/OR CHANGES DIRECTION

### LCES

LOOKOUT, COMMUNICATION,  
ESCAPE ROUTE, SAFETY ZONE

### MCEZ

MIRADOR, COMUNICACION,  
RUTA DE ESCAPE, ZONA DE SEGURIDAD

### COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES:

1. Most incidents happen on smaller fires or on isolated portions of larger fires.
2. Most fires are innocent in appearance before the “flare-up” or “blow-ups”. In some cases, tragedies occur in the mop-up stage.
3. Flare-ups generally occur in deceptively light fuels.
4. Fires run uphill surprisingly fast in chimneys, gullies and on steep slopes.

**Alignment of topography and wind during the burning period should be considered a trigger point to reevaluate tactics.**

## United States Department of the Interior

BUREAU OF INDIAN AFFAIRS  
FLATHEAD AGENCY, MT  
Pablo, Montana 59855-5555

Date September 3, 2017

### Memorandum

To: Aaron Baldwin, Branch of Wildland Fire Management Branch Chief  
Stanley Speaks, Northwest Regional Director

From: Peter Plant, Flathead Agency Superintendent

Subject: Liberty Fire Shelter Deployment 24 Hour Report

### THE FOLLOWING INFORMATION IS PRELIMINARY AND SUBJECT TO CHANGE

**Location:** Liberty Fire, Arlee, MT

**Date of Occurrence:** September 2, 2017

**Time of Occurrence:** 5 p.m.

**Report by:** David V. Chevalier

**Activity:** Fire Suppression

**Mission:** Hold fire at road; patrol, check, monitor perimeter and evaluate line integrity

**Number of fatalities:** None

**Number of injuries:** None

**Narrative:**

At approximately 1700 on Saturday, September 2, 2017, 13 crewmembers of a hotshot crew, three members of a contract engine and a Division Line Safety Officer working on the northwestern flank of the Liberty Fire experienced a sudden series of rapid wind shifts that resulted in numerous spot fires across the containment line.

The Division Supervisor gave orders for resources to evacuate and regroup at the designated Safety Zones. Sixteen firefighters from the hand crew, engine crew members and the Line Safety Officer found themselves caught between the main fire and emerging spot fires.

Thirteen firefighters escaped east into the designated safety zone. Two members of the hotshot crew and the Line Safety Officer attempted to escape downhill, but found themselves surrounded by heavy smoke and fire. The three began deploying their fire shelters when a shift in the wind cleared the air long enough for them to locate an escape route, allowing them to make their way to safety without using their fire shelters.

All 16 firefighters made it to safety and are uninjured. A team is gathering to form a Lesson Learned Review.

/s/Robyn Broyles

BIA Fire Communication and Education Specialist

x

## Fire Weather Forecast

**FORECAST NO:** 11

**PREDICTION FOR:** Day Shift

**SHIFT DATE:** Tuesday 9/5/2017

**TIME AND DATE ISSUED:** 9/4/17 2100hrs

**INCIDENT:** Horse Prairie Fire

**UNIT:** Douglas Forest Protection Association

**SIGNED:** Mary Wister 240-778-5303 (cell)

Incident Meteorologist (IMET)

---

### Fire Weather Watch for Thunderstorms Producing Abundant Lightning Wednesday

#### Discussion:

The weather pattern is changing, and the air mass is becoming more unstable. Cumulus clouds could turn into towering cumulus in the afternoon. Firewhirls are possible. It will remain unseasonably hot with low humidity today. The predominant winds this morning will be southwest shifting to the northwest in the afternoon with winds speeds less than 10 mph. A low pressure system off the California Coast is tracking into southwest Oregon and will have the energy and moisture to bring scattered showers and thunderstorms Wednesday afternoon and overnight.

---

#### WEATHER FORECAST for Today:

**SKY/WEATHER:** Partly Cloudy. Not as smoky, especially along ridges. Cumulus buildups in the vicinity.

**Max Temperature:** 88-93

**RH:** 22-30 percent.

**WINDS:** -20 foot-

Upslope/Upvalley 3-6 mph...becoming Northwest 3-7 mph in the afternoon.

-Ridgetop-

Southwest-West 2-6 mph...becoming Northwest 4-8 mph in the afternoon.

**HAINES INDEX:** 4 (Low)

**Transport Winds:** Southeast around 20 mph.

**STABILITY/INVERSION:** Smoke inversion weakening. Increasing instability above the inversion.

#### Tonight:

**SKY/WEATHER:** Partly Cloudy. Slight Chance of Showers and Thunderstorms after Midnight.

**Minimum Temperature:** 60-65.

**Maximum RH:** 70-80 percent Valleys. 60-70 percent Ridges.

**WINDS:** -20-foot- **GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS**

Northwest 2-6 mph...becoming downslope/downvalley 2-5 mph after midnight.

-Ridgetop-

Northwest 3-7 mph...becoming light and variable (less than 5 mph) late.

**HAINES INDEX:** 4 (Low)

**CWR (> 0.25"):** 10 percent

#### Wednesday:

**SKY/WEATHER:** Mostly Cloudy. Scattered showers and thunderstorms. Some storms may be strong with heavy rain, hail, and strong outflow winds.

**Max Temperature:** 80-85.

**RH:** 38-43 percent.

**WINDS:** -20 foot- **GUSTY AND ERRATIC WINDS POSSIBLE WITH THUNDERSTORMS-**

North-Northeast 2-5 mph...becoming Northwest 4-6 mph in the afternoon.

-Ridgetop-

North-Northeast 2-5 mph...becoming Northwest 4-8 mph in the afternoon.

**HAINES INDEX:** 4 (Low)

**Transport Winds:** Southeast around 30 mph.

**CWR (> 0.25"):** 50 percent

**LAL:** 4

#### Extended Outlook:

**THURSDAY...**Partly Cloudy. A chance of showers and thunderstorms. Cooler. Highs 75-80. Lows 58-65. West-Northwest winds 5-10 mph.

**FRIDAY-SATURDAY...**Partly to Mostly Cloudy. A slight chance of showers Friday. Highs in the 70s. Lows in the 50s.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 07	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Horse Prairie	<b>OPERATIONAL PERIOD:</b> Sept. 5, Day Shift
<b>DATE ISSUED:</b> Sept. 4, 2017	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> DFPA, Central Unit	<b>SIGNED:</b> <u>Mike Haasken</u> <b>Typed/printed:</b> Mike Haasken

### INPUTS

**WEATHER SUMMARY:** .DISCUSSION... The weather pattern is changing, and the air mass is becoming more unstable. Cumulus clouds could turn into towering cumulus in the afternoon. It will remain unseasonably hot with low humidity today. The predominant winds this morning will be southwest shifting to the northwest in the afternoon with winds speeds less than 10 mph. A low pressure system off the California Coast is tracking into southwest Oregon and will have the energy and moisture to bring scattered showers and thunderstorms Wednesday afternoon and overnight.

**TOPOGRAPHY:** Very steep ridge and valley topography with Table Mountain on the north and Cow Creek on the southeast part of the fire. Elevation ranges from 3,300' on Table Mountain to 800' in Cow Creek. Elevations increase above Cow Creek on the southeast end of the fire to 2,600'.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** Fuels are timber with a brush and litter understory and grass and brush fields. Fire Behavior has been extreme with running, crowning and spotting up to ½ mile. Some runs have been downhill with predominantly northerly winds. The burn period has been 24 hours. Most burned areas have full consumption of fuels and are good safety zones if there are no snags.

#### Forecasted Indices:

**1 hour fuel moisture:** 5% (+1); **10 hour fuel moisture:** 5% (+1); **100 hour fuel moisture:** 7% (+1); **1000 hour fuel moisture:** 10% (+1); **Live Woody fuel moisture:** 70 (very low)

**Energy Release Component:** 69 (-3); **Probability of Ignition:** Shaded due to smoke/clouds: 40%  
Unshaded: 70%.

**Expected Fire Behavior:** Expect moderate rates of spread and flame lengths and spotting up to ½ mile. With the unstable air, **firewhirls are possible.**

Timber Understory (TU 5): 8-10' flame length and Rate of spread of 10-15 ch/hr on a 40% slope (5 mph wind)

Shrub (SH 2): 6' flame length and Rate of spread 10-15 ch/hr on a 40% slope (5 mph wind)

**SPECIFIC:** Divisions P,M,A,Y,T: During mop up, watch for tree, stump and root tunnel burnout and ash pits. Division Q: Recent burnout; active burning along the control lines near the Division S break. Monitor the green for spots.

Division T: Monitor the active burning along Cow Creek road.

Division S: Active fire from main fire and from burnout last night. Monitor the green for spots.

**AIR OPERATIONS:** Air operations may again be hampered by heavy smoke. Myrtle Creek Sunrise is 6:43 AM; Sunset is 7:42 PM.

**Mop Up Terminology:** "Capped Heat": This undesirable thing happens when water is sprayed on buried burning material without mixing it up with a hand tool. This is usually roots or thick duff and the hot spot can resurface after the "cap" dries back out.

## Resource Protection on BLM Lands

### Horse Prairie Fire

- Avoid application of retardant, foam or other chemicals to waterways unless the fire is deemed a threat to human safety or private property.
- Avoid use of dozers in riparian areas.
- Notify Resource Advisor of location if cultural artifact items are found. Remember, removing cultural artifacts is illegal.
- Locate fire lines to minimize directing water into waterbodies or wetlands.
- There are several Spotted Owl and Marbled Murrelet Nest sites near the current fire area. When planning suppression activities in older forests work with READ's to reduce impacts.
- If drafting out of Olalla Creek, Cow Creek, Union Creek or Doe Creeks use 3/32" screens on draft intake. Screening material and zip ties can be picked up at supply.
